

Indicator: School Stability (K-12)

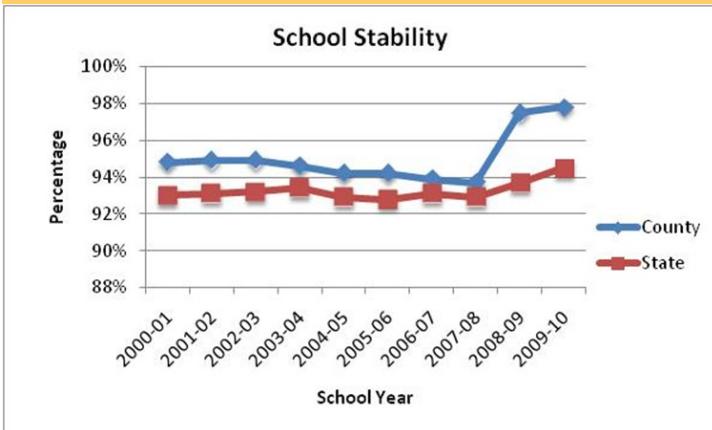

Description: Percentage of public school students from the October student count who are at the same school in February of the same school year.

Sources: Florida Department of Education, Florida School Indicators Report, <http://www.fldoe.org/eias/eiaspubs/fsir.asp>

Caveats: School stability is calculated using data accumulated from all public schools within the district. Within county mapping of school attendance zones for all public elementary, middle, and high schools is not possible using one single set of maps. School attendance zones will overlap.
